

Experiment 7: Low-Fidelity Paper Prototypes and Digital Wireframes for Banking App

Name: Vishnu Priya D K

Roll No: 240701603

Aim

To develop low-fidelity paper prototypes for a banking application and convert them into digital wireframes.

Objective

- To design paper prototypes for a banking app.
- To convert sketches into digital wireframes.
- To improve navigation and usability through prototyping.
- To understand the UI design process in HCI.

Description

The experiment includes designing banking app screens first as hand-drawn paper prototypes and later converting them into digital wireframes.

Low-Fidelity Paper Prototypes

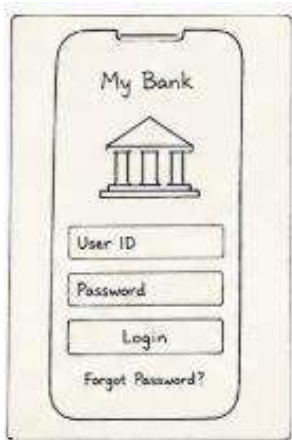

Paper prototypes were created using simple sketches to represent:

- Buttons
- Input fields
- Navigation flow
- Screen layout

These prototypes helped in quick design planning and idea visualization.

Screens Designed

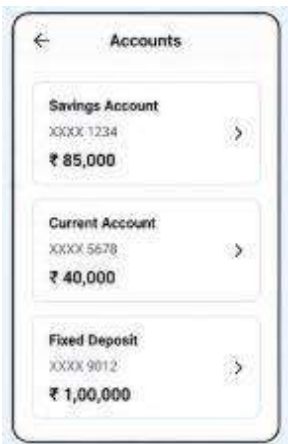

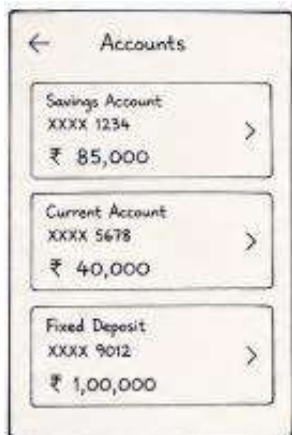

1. Login Screen

2. Home Dashboard

3. Accounts Screen

4. Transfer Money Screen

A hand-drawn wireframe for a 'Transfer Money' screen. It features a back arrow and the title 'Transfer Money' at the top. Below the title, there are four input fields: 'To' (with a placeholder 'Enter Mobile/Account Number'), 'Amount' (with a placeholder '₹ 0.00'), and 'Remarks (optional)' (with a placeholder 'Enter remarks'). A 'Proceed' button is located at the bottom.

A digital wireframe for a 'Transfer Money' screen. It features a back arrow and the title 'Transfer Money' at the top. Below the title, there are four input fields: 'To' (with a placeholder 'Enter Mobile/Account Number'), 'Amount' (with a placeholder '₹ 0.00'), and 'Remarks (optional)' (with a placeholder 'Enter remarks'). A 'Proceed' button is located at the bottom.

5. Transaction History Screen

A hand-drawn wireframe for a 'Transactions' screen. It features a back arrow and the title 'Transactions' at the top. Below the title, there is a list of transactions with the following details: 01 May Grocery - ₹ 1,200; 30 Apr Salary + ₹ 50,000; 28 Apr Electricity Bill - ₹ 1,000; 25 Apr Online Shopping - ₹ 2,500; 20 Apr Mobile Recharge - ₹ 500.

A digital wireframe for a 'Transactions' screen. It features a back arrow and the title 'Transactions' at the top. Below the title, there is a list of transactions with the following details: 01 May Grocery - ₹ 1,200; 30 Apr Salary + ₹ 50,000; 28 Apr Electricity Bill - ₹ 1,000; 25 Apr Online Shopping - ₹ 2,500; 20 Apr Mobile Recharge - ₹ 500.

Digital Wireframes

The paper sketches were converted into digital wireframes with:

- Structured layouts
- Better alignment
- Icons and navigation bars
- Improved visual clarity

HCI Principles Used

- Consistency
- Simplicity
- Visibility
- User-friendly navigation
- Feedback

Methodology

1. Analyze banking app requirements.
2. Draw low-fidelity paper sketches.
3. Design screen navigation flow.
4. Convert sketches into digital wireframes.
5. Evaluate usability and interface clarity.

Result

The banking app prototype was successfully designed using paper sketches and digital wireframes. The digital version provided better usability and improved screen organization.
