

Experiment 8: Storyboard Design for Food Delivery Mobile App

Name: Vishnu Priya D K

Roll No: 240701603

Aim

To create storyboards representing the user flow for a food delivery mobile application.

Objective

- To visualize user interaction in a food delivery app.
- To represent the sequence of tasks performed by users.
- To improve navigation and usability through storyboard design.

Description

The experiment includes creating storyboard screens that represent the complete ordering process in a food delivery application.

HCI Principles Used

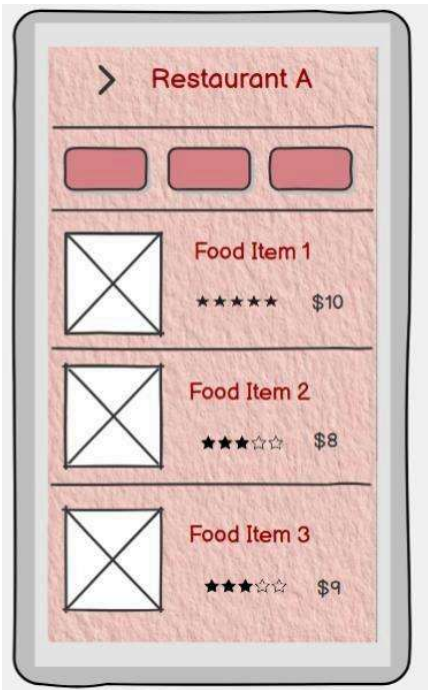

- Consistency
- Simplicity
- Visibility
- Feedback
- Easy navigation

Screens Included

1. Search Restaurant Screen

2. Restaurant Menu Screen

3. Cart and Total Screen

A hand-drawn illustration of a mobile app screen for a shopping cart. The screen has a light pink background with a subtle pattern of small white dots. It is divided into sections by horizontal lines. The top section lists three food items with their quantities and prices: 'Food Item 1 : 2* \$10 = \$20', 'Food Item 2 : 1* \$10 = \$10', and 'Food Item 3 : 2* \$9 = \$18'. Below these items, the total price is displayed as 'Total : \$48'. At the bottom of the screen, there are two buttons: a smaller 'Remove' button on the left and a larger 'Check Out' button on the right.

Food Item 1 : 2* \$10 = \$20

Food Item 2 : 1* \$10 = \$10

Food Item 3 : 2* \$9 = \$18

Total : \$48

Remove

Check Out

4. Delivery Information Screen

A hand-drawn illustration of a mobile app screen for delivery information. The screen has a light orange background with a subtle pattern of small white dots. It is divided into sections by horizontal lines. The top section is for the user's name, with the label 'Name' and a text input field containing 'Angel'. The next section is for the address, with the label 'Address' and a text input field containing 'No.6,Gandhi St,Avadi'. The third section is for the phone number, with the label 'Phone no' and a text input field containing '9592399838'. Below these input fields, there are three payment options, each with an unchecked checkbox and a label: 'Cash On Delivery', 'Credit Card', and 'UPI'.

Name

Angel

Address

No.6,Gandhi St,Avadi

Phone no

9592399838

☐ Cash On Delivery

☐ Credit Card

☐ UPI

5. Payment and Order Summary Screen

6. Order Confirmation Screen

User Flow

Step 1 – Search Food

User searches for food categories such as pizza, burger, and Chinese food.

Step 2 – Select Restaurant

User selects a restaurant from the available list.

Step 3 – Choose Food Items

Food items are displayed with price and ratings.

Step 4 – Add to Cart

Selected items are added to the cart and total amount is calculated.

Step 5 – Enter Delivery Details

User enters address and phone number.

Step 6 – Payment

User selects payment methods such as Cash on Delivery, Credit Card, or UPI.

Step 7 – Place Order

User confirms and places the order.

Step 8 – Order Confirmation

The app displays order confirmation and tracking details.

Result

The storyboard successfully represented the complete user flow of the food delivery application and improved understanding of user interaction and navigation.
